Built to Connect. Built for More.™

Customers from across the globe asked us for more efficiency in engaging their branch visitors and more opportunities for consumer loyalty. Consumers have demanded more service and secure access to their banking transactions. We provide the desired "more" and offer a kiosk terminal that can combine traditional self-service with online banking functions.

More Personalized

An engaging design combined with user-friendly interface provides a unique experience at the intersection of physical and digital channels.

More Integrated

An A4 document scanner for invoices and remittance slips, a printer with configurable document length, and a portrait camera with autofocus for convenient online consulting ensure higher customer satisfaction.

More Available

Easy access to components enables convenient and fast service and operating.

More Efficient

More functionality combined from traditional self-service and online banking ensures efficient engagement of branch visitors.

More Future-Ready

We offer the kiosk terminal in different versions with the same compact footprint: with printer / without scanner as well as with printer / with scanner.

More Secure

Privacy panels on the left and right, as well as an awareness mirror, offer consumers reliable protection.
